WELCOME

At Solatube, we specialize in transforming your home with the power of natural light and fresh air. Solatube is at the forefront of the Wellness Real Estate Movement, delivering natural light and fresh air to spaces of all types. We take pride in our cutting-edge technology and unwavering commitment to innovation, consistently leading the industry forward.

Our global headquarters are located in Vista, California, where we design and manufacture cutting-edge, sustainable technology. Recognized as the premium choice in our category, we set new industry benchmarks through continuous innovation and a commitment to global impact—consistently exceeding expectations.

Our state-of-the-art daylighting and ventilation systems are designed to enhance your living spaces, creating brighter, healthier, and more energy-efficient environments. Discover how Solatube can bring the beauty and benefits of natural light and fresh air into your home.

Bringing the outdoors **into your home.**

Benefits of natural light.

Harnessing the power of natural light can significantly improve your health, elevate your mood, and enhance the overall quality of your living environment. Naturally lit spaces feel more open, welcoming, and full of life. Solatube® Daylighting Systems deliver beautiful, full-spectrum natural light into your home using advanced, highly reflective tubing. Complementing this, HSE Skylights offer crystal-clear views and refreshing ventilation through their innovative, high-performance designs.

Improves Mood and Reduces Stress

Exposure to natural light has been shown to improve mood and reduce stress.

Enhances Learning and Cognitive Function

Natural light can significantly enhance learning abilities and cognitive function.

Improves Sleep Patterns

Exposure to natural light during the day helps regulate circadian rhythms, promoting better sleep.

Increase Energy Levels

Natural light can enhance your energy, productivity and reduce fatigue.

Enhances Aesthetic Appeal

Natural light enhances the appearance of your home, making spaces look larger and more inviting.

Increases Home Value

Homes filled with natural light are more attractive to buyers and can command higher prices.

Natural light isn't just a luxury—it's essential for your well-being. Natural daylight helps regulate your circadian rhythm, boosts serotonin levels, enhances brain function, and contributes to a healthier, more vibrant life.

Daylighting Systems

Solatube® Brighten Up® Series

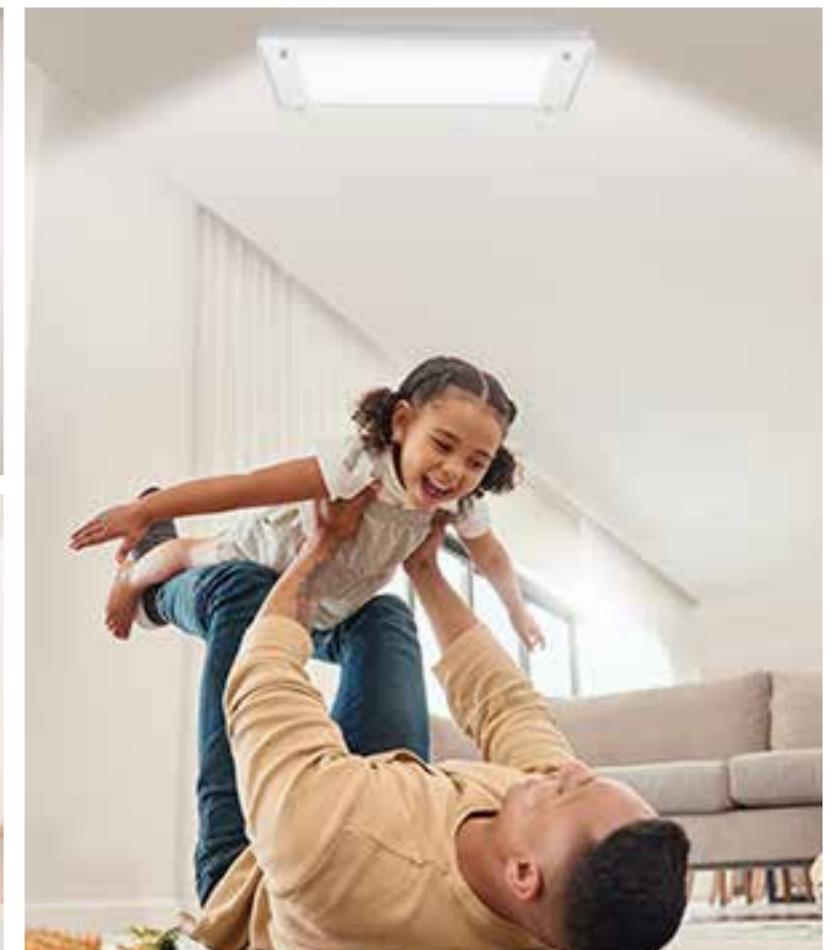

Fill your home with beautiful, natural light and create inspiring spaces where you love to live and work.

Without proper lighting, even the most stylish home can feel dark and unwelcoming—making it harder to read, cook, or distinguish colors. Solatube Daylighting Systems (also known as Tubular Skylights) transform dim, closed-in rooms into bright, inviting spaces—even on the ground floor or in the basement.

Best of all, Solatube Daylighting Systems deliver bright, natural light into your home, enhancing your space without the heat or UV rays. It installs in just 2 hours, offers 99% UV protection, includes dimming capabilities, and is backed by the industry's highest performance guarantee—transforming any room with cleaner, more energy-efficient illumination.

Experience the difference of natural light—what are you waiting for?

“How can we brighten your day?”

Natural light. Brilliant technology.

At Solatube International, we design our daylighting systems using optical technology to significantly increase the amount of daylight, bringing beautiful, natural light into every room of your home.

We've spent the last 30+ years perfecting this technology to ensure our Solatube Daylighting Systems perform better than other tubular daylighting devices on the market.

Capture

Raybender® 3000 Technology

- Redirects low-angle sunlight for maximum light capture
- Provides consistent daylighting throughout the day
- Rejects overpowering summer midday sunlight

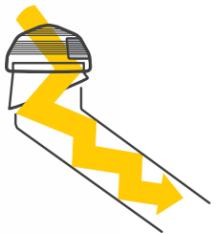

LightTracker™ Reflector

- Redirects low-angle winter sunlight for maximum light capture
- Increases light input for greater light output
- Delivers unsurpassed year-round performance

Transfer

Spectralight® Infinity Tubing

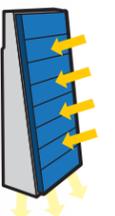

- Delivers 99.7%* specular reflectivity for maximum sunlight transfer
- Provides the purest color rendition possible so colors are truer, brighter
- Allows for run lengths over 30 feet to deliver sunlight to lower floors

Generate

Integrated Solar NightLight (in select models)

- Photovoltaic panel collects solar energy
- Stored energy powers smart NightLight which automatically comes on at night

Deliver

Optical Diffusion and Control

- Solatube Decorative Fixtures
- Warming and softening Effect Lenses
- Optional add-on accessories: Light Kit, Ventilation Kit, and Daylight Dimmers

Customize your Brighten Up Daylighting System.

We offer different tubular skylight sizes (160 DS 10" and 290 DS 14" wide tubes, respectively, with lengths up to 30") to fit different applications and spaces. Whether you want a daylighting system with a round or square decorative fixture, one that integrates a solar-powered NightLight (ISn models), or one of our standard systems, we have all the functionality you need.

DS Models

Our Brighten Up Daylighting Systems (DS Models) are great for any room in your home and delivers maximum natural light.

ISn Models

Our Integrated Solar NightLight (ISn Models) gives you the ability to softly light your way at night and enjoy natural light all day long.

More product features that absolutely shine.

Sunlight Collectors

Whether you choose our high-utility dome or our sleek, low-profile collector, you'll benefit from having the most advanced sunlight-capturing technologies available on your roof.

Decorative Fixtures for Beautiful Delivery

We offer a full line of attractive fixtures—both round and square—that create gorgeous spaces in your home with beautiful, diffused light. Our selection of decorative fixtures can add style and beauty into any decor.

Mounting for Any Roof

Solatube has leak-proof flashing options to mount its sunlight collectors (standard and low-profile) on any roof type, from shingle to tile, and everything in between.

Add-Ons & Accessories

From dimming to electric light and ventilation add-ons, you get the options you need to completely control your daylighting system.

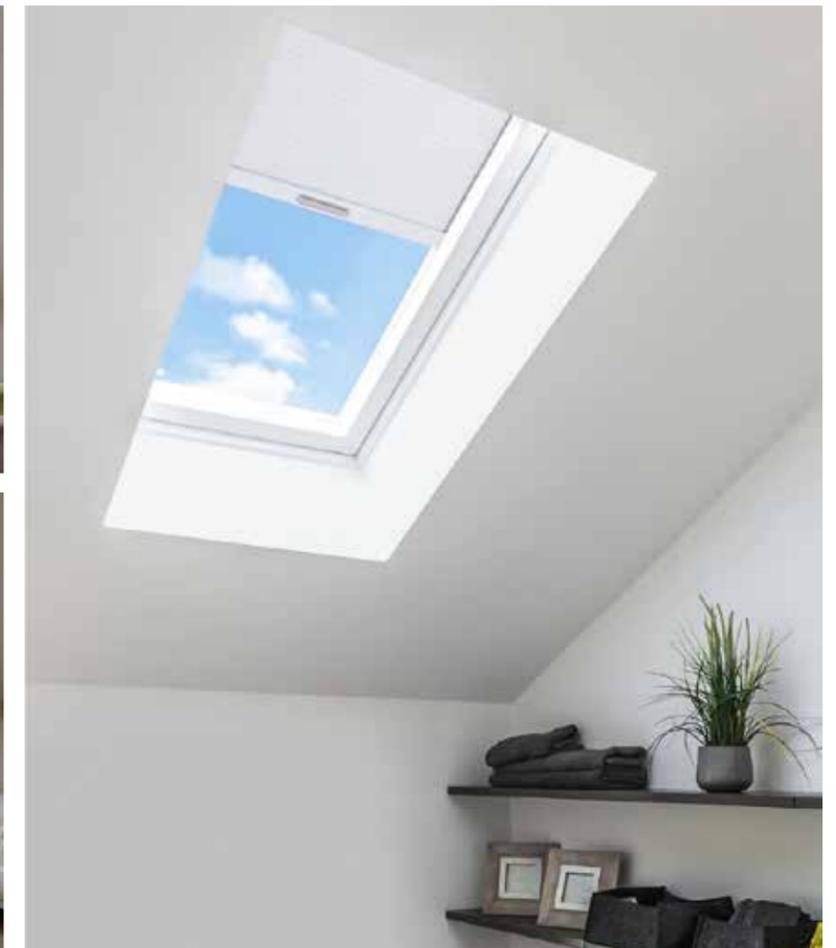

Skylights

Solatube® HSE Performance Series

Enjoy Health, Safety and Efficiency with our HSE Performance Series Skylights. Experience the best of nature indoors with Solatube's advanced skylight designs, promoting wellness by filling your home with natural light and fresh air for a brighter, healthier environment. Built with high-performance, double-pane insulated glass, these skylights are engineered to maximize your health, safety and your homes energy efficiency.

Solatube's Solar-Powered Fresh Breeze Skylights bring both natural light and fresh air into your home with a solar-powered, operable design featuring a rain sensor that automatically closes the skylight when needed, along with remote control operation.

For a more traditional look, Solatube's Premium Fixed Skylights provide durable, energy-efficient glass, impact resistance, and a weatherproof design for long-lasting performance.

“Start enjoying your skylight again.”

Skylight technology that's clearly superior.

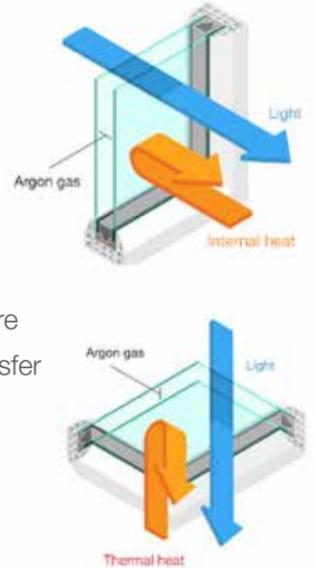

Experience cutting-edge skylight technology engineered for **HEALTH**, **SAFETY**, and **EFFICIENCY**. Upgrade your space with improved energy performance, superior sound insulation, and greater indoor comfort. Enjoy a healthier living environment, long-lasting durability, and an attractive, modern aesthetic.

Dual Pane Glass

Hail Tested/Impact-Resistant Safety Glass

- Hail tested per FM 4473*
- High-performance laminated safety glass
- 14mm insulated spacer filled with Argon gas
- Low-E glass blocks harmful UV light and minimizes glare
- Integrated thermal barriers minimize heat and cold transfer
- Designed for maximum sound absorption

Durable Construction

Weatherproof and Corrosion-Resistant

- Constructed with high-quality aluminum to protect against corrosion and enhance curb appeal
- Powder coated to provide a durable, attractive finish that resists surface corrosion
- Designed with optimal dimensions and overlapping construction for easy retrofit and weatherproof protection
- Fasteners are non-corrosive to withstand even the toughest weather conditions

Ventilation

Optional Fresh Breeze Model

- Fully concealed battery and control center
- Solar-powered operable design lets fresh air in
- Rain sensor automatically closes if rain is detected
- Remote control for easy operation

This will change how you look at skylights.

Our premium HSE skylights dramatically change any room with natural light. Our premium skylights are beautiful on the interior and exterior of homes. With our premium grade HSE Performance Series Skylights, you benefit from features that enhance the Health, Safety, and Energy Efficiency of daylighting your home.

Health

- Natural light and fresh air
- Healthier living spaces
- Optimal glare reduction
- Engineered for noise reduction

Safety

- Laminated safety glass
- Impact protection and security
- Blocks harmful UV rays
- Hail/Impact Resistance*

Energy Efficiency

- Low-E glass
- Integrated thermal barriers
- Minimal heat and cold transfer
- Insulated dual pane glass
- Maximized thermal performance

The softer side of bright.

SoftLight™ Glass

Solatube SoftLight Glass provides beautiful diffused natural light by reducing glare and spreading light evenly. Our SoftLight Glass Technology provides maximum heat reduction, increased thermal performance and comfort. SoftLight Glass gently diffuses daylight that reflects heat and washes your space with brilliant natural light.

Performance Skylight Shades

Solatube exclusive skylight shades feature an attractive, non-woven pleated polyester fabric and a sleek powder-coated aluminum frame that will add contemporary beauty to your home while giving you control over your lighting needs. The shades can be operated by hand or by a lightweight 16-foot adjustable telescoping pole. Our shades are available in both standard and custom sizes.

Benefits of fresh air.

Enhance your home's indoor air quality and comfort with Solatube's advanced ventilation products, including our Whole House Fans, Solar-Powered Attic & Garage Fans, and Garage Fans. These solutions bring in fresh air and help cool your home.

Cooler Home

Helps maintain a consistent and comfortable indoor temperature.

Save Money

Lower energy consumption and A/C bills.

Improved Air Quality

Reduces indoor pollutants, allergens, and odors, promoting cleaner, fresher air.

Moisture Control

Prevents mold and mildew growth by reducing humidity levels.

Prolong the life of your home

Circulating fresh air in your attic and home will increase the lifespan of your roof and HVAC systems

Boosts Mental Clarity and Mood

Fresh air increases oxygen levels, which can enhance focus, reduce fatigue, and improve overall well-being.

“Now that’s a breath of fresh air.”

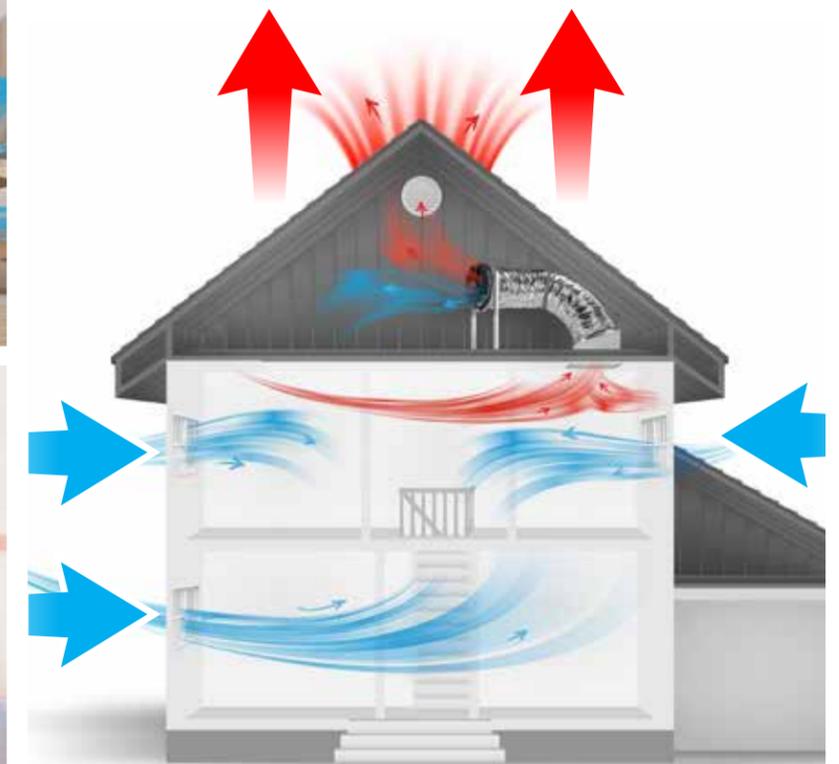

Whole House Fans

Solatube® Engineered Performance Series

If you're looking for more cool for your cash, then meet the new Engineered Performance Series (EPS) Whole House Fans from Solatube. These fans don't just cool your home—they're a smarter, more energy-efficient way to live comfortably.

With powerful circulation, our Whole House Fans push out stale air and pull in fresh, cool outdoor air, allowing your A/C unit to rest and only work when necessary—drastically lowering your energy consumption and cutting your cooling costs.

Engineered with the latest in energy-efficient technology, the Engineered Performance Series ensures quiet operation, durability, and ease of use. By helping to maintain optimal airflow, these fans support better indoor air quality, contributing to a healthier living environment year-round. Whether it's the hottest summer day or a mild evening, you'll feel the difference in comfort—and the savings on your utility bills. Rest easy knowing that Solatube's Engineered Performance Series Fans are designed to deliver performance, savings, and long-term reliability.

“Chill out A/C. We got this.”

Engineered to last.
Engineered to blast (quietly).

Meet the new Engineered Performance Series Whole House Fans from Solatube—designed to deliver powerful airflow while helping your A/C take a well-earned break. By reducing the need for constant air conditioning, our fans significantly cut down on energy use and lower your utility bills.

Plus, increased ventilation means improved indoor air quality. Whole-house fans help reduce the airborne spread of viruses and other pathogens by bringing in fresh outdoor air—supporting strategies for healthier homes.

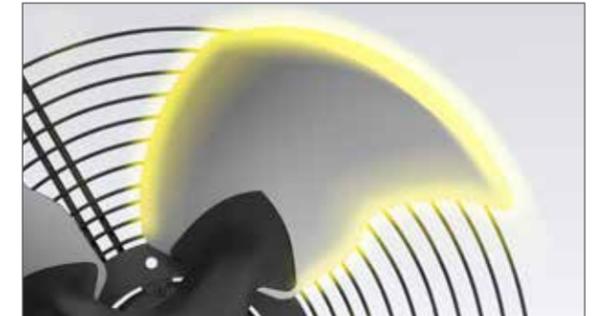

- 
Instantly Cool
- 
Reduce A/C Bills
- 
Comfort & Efficiency
- 
Ultra-Quiet Operation
- 
Removes Odors & Dirty Air
- 
Eliminates Stale Air

Features that revolutionize your home's comfort.

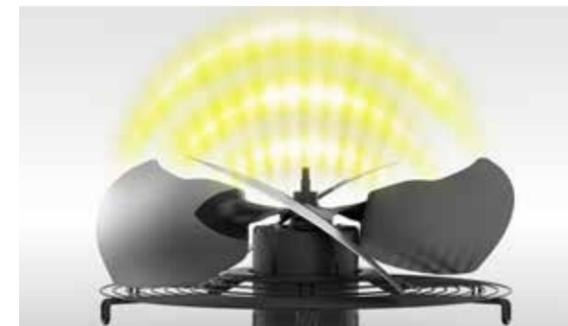

Cool comfort and a healthier home at the touch of button.

Dial in your efficiency, temperature, and air freshness with the Comfort Control Remote. With 7 variable speed options, you'll have the ability to balance energy consumption with circulation and comfort.

Efficient design means you save a lot more.

Innovative Soft Start technology saves electricity and extends the motor's life, while the Jet Blade design dramatically increases power and decreases noise and vibration. These technologies work harder so the motor doesn't have to, which saves you money and extends the life of the unit.

A whisper powerful enough to reach every corner of your home.

The perfect blend of power and grace. Our EPS Whole House Fans deliver high CFM with minimal noise, thanks to precision blades, HushMount™ 2 technology, and R6-insulated damper doors for energy efficiency all year long.

Unbelievable power. Unreal savings.

Equipped with an EC brushless motor and 7 variable speeds, it delivers long-lasting strength and energy-efficient operation, ensuring your A/C unit only works when necessary—significantly lowering energy consumption and cooling costs.

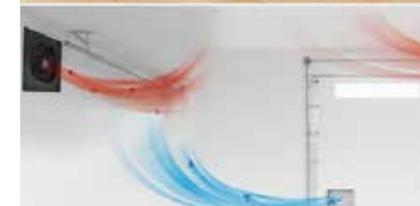

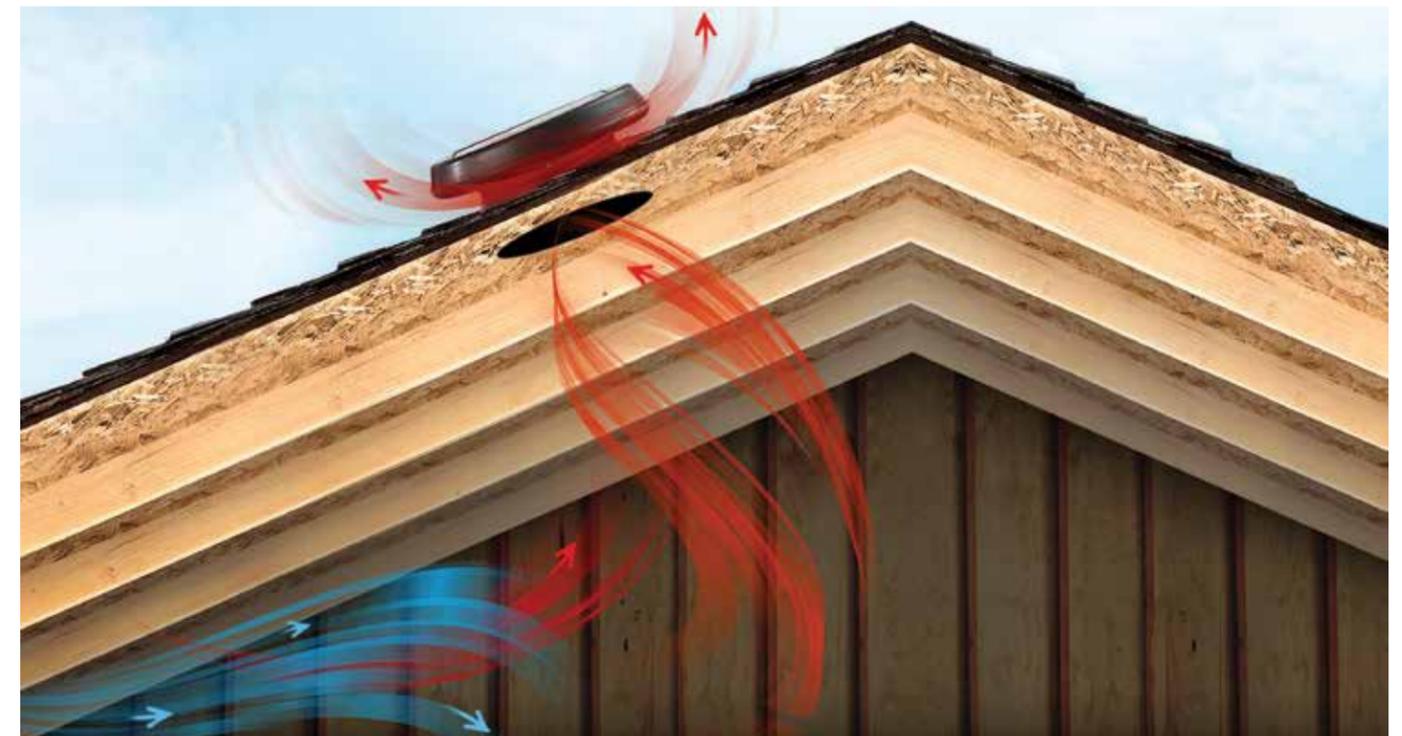

Solar-Powered Attic & Garage Fans

Our Solar Attic Fans offer big power for a big impact. A cool attic is a cool home.

Our solar-powered fans combine advanced motor technologies with progressive designs and are powered by a huge 35-watt solar panel with ClimaSense™ technology. This superior system delivers exceptional power, efficiently venting hot air and moisture to keep your attic cool and dry, day and night. It enhances home and garage comfort, prolongs the life of your roof and air conditioner, and reduces energy bills with whisper-quiet operation, making it an unbeatable investment in your home's efficiency and comfort.

All models are now available with the New ClimaSense™ run-at-night technology.

“Say goodbye to heat and hello to cool.”

Big power for big impact.

When summer strikes with full force, you need a powerful solution to keep your attic cool from sunrise to sundown. A Solar Powered Attic Fan rises to the challenge, efficiently venting trapped heat and reducing the strain on your home's cooling system. But its benefits don't end with the season—by equalizing interior and exterior temperatures, it also protects your home through winter, preventing moisture buildup and ice damming.. It's a year-round guardian powered by the sun.

Removes heat and humidity

Prevents mold & moisture

Run at night technology*

*ClimaSense™ models only

Reduces A/C cost

Ultra-quiet operation

Advanced features that work hard.

NEW ClimaSense™ Series

Our advanced ClimaSense™ technology delivers continuous ventilation, even after sunset, by detecting attic temperature and humidity—providing consistent cooling and year-round comfort, day and night.

High-Performance Motor

Engineered with a brushless, ultra-efficient EC motor that delivers long-lasting performance and near-silent operation. Soft Start technology extends motor life while reducing energy use.

Advanced Photovoltaic Solar Panels

Maximum sun power, maximum savings. Capture more energy with high-efficiency solar panels engineered to convert sunlight into powerful performance. Designed to operate longer and stronger—even in low-light conditions.

Solutions for Every Roof Type

Whether your roof is shingle, tile, flat, or pitched, we have a solar attic fan that fits. Our low-profile, weather-resistant designs blend in beautifully and perform flawlessly across all roof types.

Garage Fans

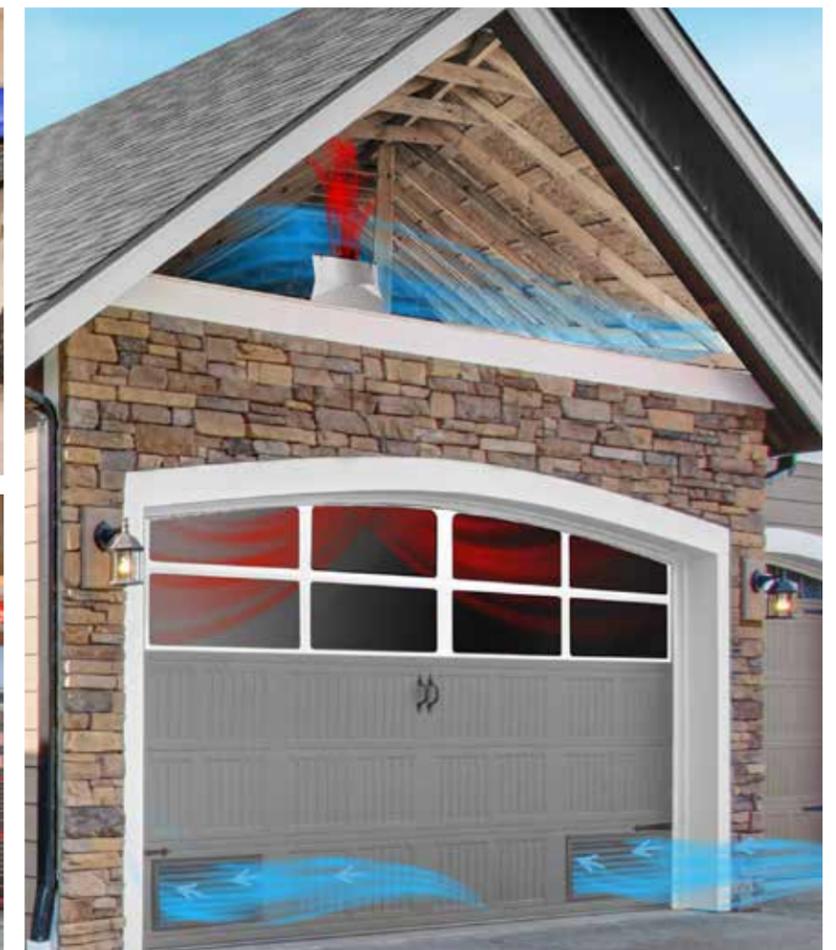

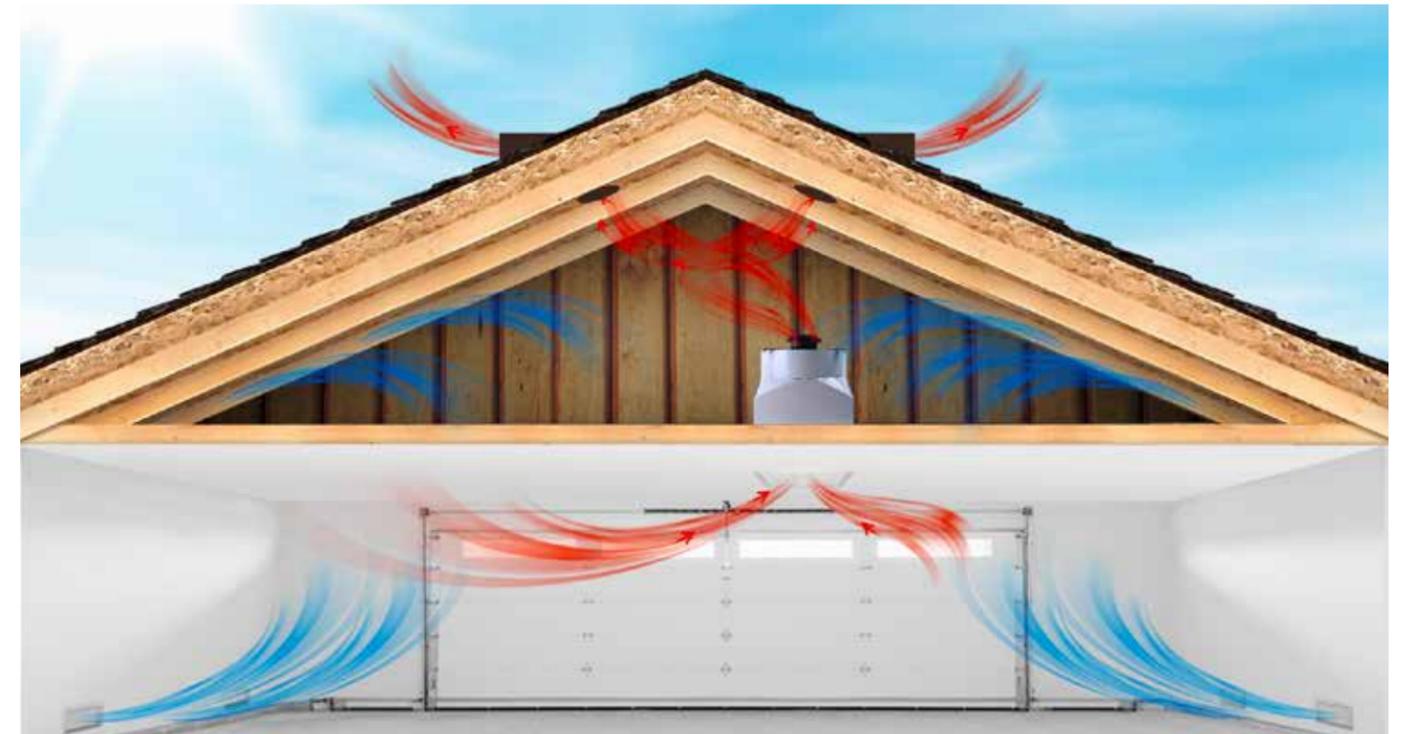

You have many uses for your workspace. We have many ways to keep it cool and healthy.

Whether it's a garage, workshop, man-cave/she-shed, or backyard outbuilding, your space serves many purposes. At Solatube, we offer smart, effective solutions to keep it cool, fresh, and healthy—no matter how you use it.

From fine-tuning your car and lifting weights to building, creating, or simply unwinding, our ventilation systems are designed to remove hot, stale air and replace it with cool, refreshing airflow. The result? A more comfortable environment that supports your productivity, performance, and well-being.

Hot, stale air out. Cool, fresh air in.

“Being COOL is a breeze.”

Hey- Cool it!

Solatube Garage Fans -

The perfect solution to remove heat and odors from garages, man caves, workshops, and outbuildings.

This new product design features a high-power energy efficient brushless motor that is paired with five engineered blades to give maximum air flow and quiet operation. The integrated fire damper control system provides peace of mind and safety. The included remote features custom temperature control and is equipped with manual on/off functions.

Removes heat and humidity

Remove odors

Configurable temperature control

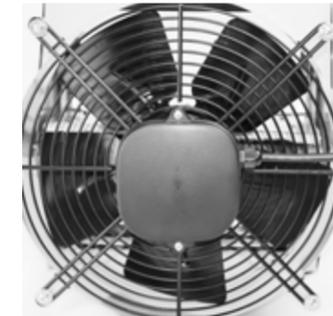

Ultra-quiet operation

Features that work hard so you can chill.

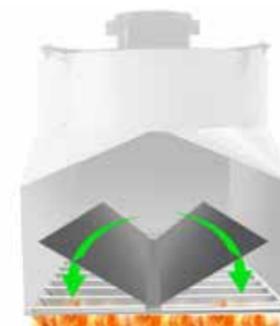

Comfort Control Remote

Experience a cool breeze right at your fingertips with customized temperature control that adapts to your needs. Enjoy the convenience of manual on/off capabilities, giving you complete control over your comfort.

High-Powered Efficient Motor/Fan Assembly

Featuring five precisely engineered blades designed for maximum CFM (cubic feet per minute), this fan delivers powerful airflow with exceptional efficiency. Its energy-efficient brushless motor ensures quiet operation and long-lasting performance.

Fire Damper Control System

A spring-loaded fire-sensing damper helps prevent the spread of fire, activating automatically in high-heat conditions for added safety. This feature meets all garage fire rating requirements, ensuring both protection and compliance.

Maximum Airflow

Designed to optimize airflow, this unit fits seamlessly between ceiling joists with no structural modifications required—making installation quick, clean, and hassle-free.

WE ARE PLANET PASSIONATE

Solatube International manufactures high-performance products that lower electricity consumption and greenhouse gas emissions.

We are also committed to reducing our carbon footprint and minimizing our environmental impact.
