

SOLATUBE®

Bathroom Fan

Powerful Ventilation For All Bathrooms

Air Your Grievances

Are you one of the millions of homeowners with a bathroom fan that simply doesn't get the job done? Is your ceiling grille disgusting and discolored? Does your fan motor sound worse than your garbage disposal? And is your bathroom moldy and malodorous? Or do you simply not even have an exhaust fan?

It's time to switch out that old, ineffective bath fan with a new performance fan from Solatube. Enjoy the pleasant whoosh as the powerful and effective fan quickly exhausts humidity, and embarrassing odors. Trust us, you won't be the only one who appreciates the upgrade!

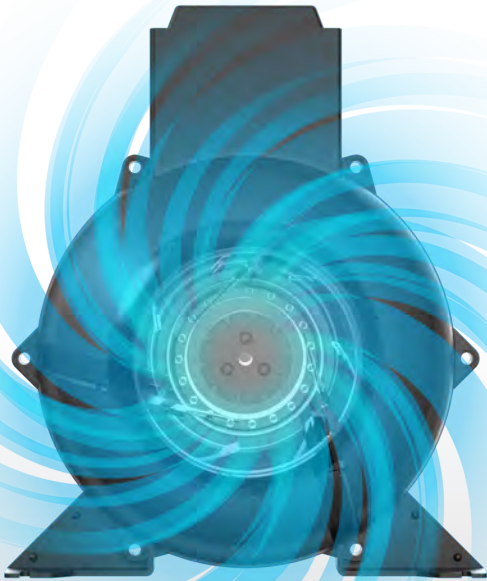

The Solatube Performance Bathroom Fan

A powerful solution tailored to your home.

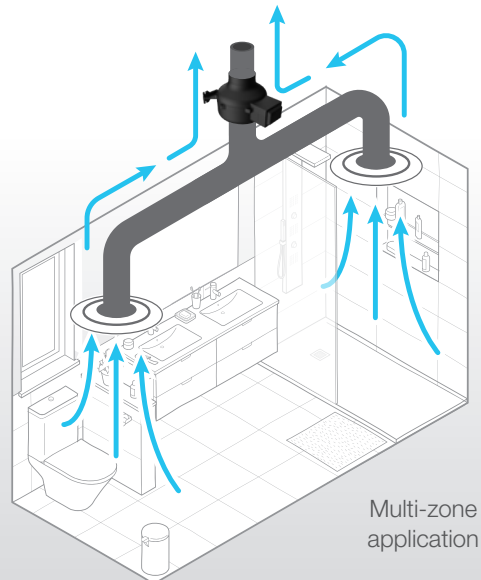

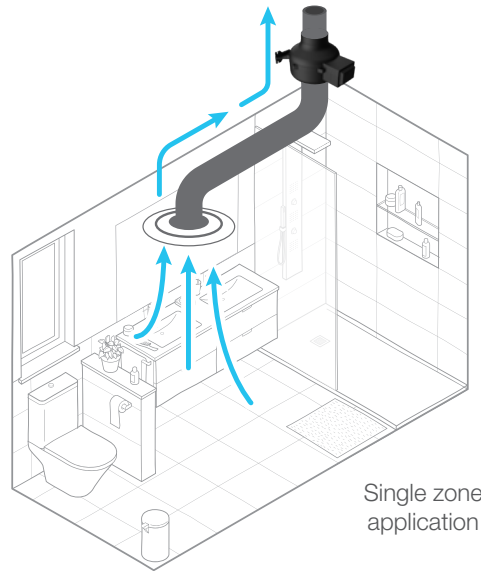

Meet Your New Bathroom Fan

The Solatube bathroom fan boasts a powerful in-line exhaust fan that produces an ultra-fast 3000 RPMs and moves 145 cubic feet of air per minute – nearly 3 times more than the cheap common fans. The precision-balanced fan blades are vibration-free, so instead of rattling and shrieking, you'll hear soft airflow as moisture and odors eliminate through a whirlwind vortex.

Specs: 120 Volts, 3000 RPMs, 145 CFM,
Integrated junction box and mounting bracket

Find Your Comfort Zone

We've Got You Covered

Often, the fans that we replace have varying ceiling grilles. Not to worry! We have multiple options to replace your existing grille without disrupting the drywall and structure.

Our humidity sensor does the thinking for you.

Optional

The optional humidity sensor automatically turns the fan on when excess humidity is detected. This minimizes moisture and stops mold and mildew. If odor is an issue, you can also manually activate the fan.

Call Today for a Free Consultation

Our certified team is ready to take your call and take care of your ventilation issues right away no matter the size, shape or configuration of your bathroom.
