

Experience a New View of Daylight

Introducing the OptiView® Fresnel Diffuser for Brighten Up® and SolaMaster® Series

An elevated daylighting experience for Solatube® tubular daylighting systems.

Solatube tubular daylighting systems capture natural daylight at the roof and deliver it deep into interior spaces where windows and traditional skylights cannot reach. The new OptiView® Fresnel diffuser enhances that experience with refined optics and beautifully balanced illumination.

A More Natural Connection to the Outdoors

A precision-engineered matrix of Fresnel lenses delivers comfortable, evenly distributed daylight throughout the space. The result is a brighter, more inviting interior that enhances visual comfort and strengthens occupants' connection to the outdoors through natural daylight.

Designed for Modern Commercial Spaces

OptiView® Fresnel delivers uniform daylight distribution with enhanced visual comfort, making it an ideal solution for commercial environments where daylight quality and architectural aesthetics are equally important.

Engineered for Exceptional Daylighting Performance

Concentric Fresnel lenses are designed to distribute daylight evenly throughout the space while enhancing wall-wash performance. The refined optical design creates consistent illumination that complements today's architectural interiors.

Simple Integration. Clean Architectural Appearance.

OptiView® Fresnel integrates seamlessly with existing Solatube® fixture rings and trim assemblies for straightforward installation. Its low-profile, flush design creates a clean ceiling appearance while maintaining visual continuity across the Solatube diffuser family.
